ARMA Members \$75.00; Non-Members \$100.00;

Students (Valid ID) \$25.00

Sylvain Dumas
Systems Consultant, McAfee
Sylvain_Dumas@McAfee.com

Sylvain Dumas has been a systems consultant for McAfee since 1999. He has more than 30 years of experience in networking and security. Sylvain has helped securing multiple government entities both federal and provincial as well as many financial institutions and large corporations. He participates regularly to multiple public conferences such as the HTCIA, CQSI and others. He is certified CISSP.

“How to Secure Data within Your Organization”

IT in organizations are well versed in securing infrastructures; making sure no one gets into their network by installing strong firewalls, intrusion prevention systems, anti-virus, anti-spam and many other techniques designed to prevent breaches from the bad guys. That's all fine and dandy but that protects only the walls of the castle not the content. Securing data is a whole different ball game. Data is not protected the same way as infrastructure. Data requires a totally new frame of mind. Getting access to the data is one thing, but controlling how and where it can be used, or how it can be transported securely, how and if it can get out of the walls of the enterprise, what data should be protected and from whom, classification, new or existing data... and the biggest question: Where do I start? We will help by defining steps to get better data protection, what is important and what's not, tips to avoid failure in implementation and more.

Paul Lewis
Chief Technology Officer, HDS
paul.lewis@hds.com

Paul Lewis is an experienced senior technology executive skilled in leading high-performance strategy, application, and infrastructure technology services. Combined with over 18 years of deep business knowledge of Canadian and International financial services, consistently provides reliable, cost-effective strategic planning and solutions to meet the most challenging corporate objectives. Designed and led organization wide technology, strategic, and business initiatives including delivering dominant financial service industry utilities, massive infrastructure consolidation and cost savings initiatives, and corporate integrations

“How to Securely Access Private Information from Anywhere in the World from your Handheld”

Today's workers want seamless, work-related file sharing and synchronization - anywhere, and on any device - just like the free consumer cloud options. The rise of cloud, Bring Your Own Device (BYOD) and file synchronization and sharing pose new challenges for IT and RIM. We'll discuss the evolution in storage: the object store and the challenges of unstructured data. We could also demonstrate how you could securely access any of your private information from anywhere in the world from your handheld.

What is ARMA?

ARMA is an association of records, information and knowledge management professionals

Join the Professionals

For information on joining the **Atlantic Chapter** or about upcoming events, contact any of our Chapter officers or visit our web site at www.nbarma.org.

ARMA Atlantic Chapter's Mission

To promote the advancement of the information management profession by providing strategic resources, education and networking opportunities.

Committed to professional excellence, our core values are: Accountability; Integrity; Leadership, and Good Governance.

Who belongs to ARMA?

The ARMA **Atlantic Chapter** is one of 150 chapters of ARMA International. The Association has over 10,000 members worldwide. They include records managers, IT managers, legal professionals, educators, archivists, corporate librarians, consultants, and image specialists.

What are the benefits of membership?

- **Education** - Presentations by professionals about relevant records management topics during local monthly sessions, seminars, and workshops.
- **Networking** - Professionals representing all aspects of the field to assist you in solving or avoiding records management problems and enhancing your career.
- **Newsletter** – The E-Bulletin provides information on the Chapter and its activities.
- **Publications** – Providing RIM information via the Information Management Journal, Info Pro, and Canadian Policy Brief.
